DUANE BENEDICT A. MAHINAY

Taguig, Metro Manila, Philippines | 0968-2204-305 | Duanemahinay@gmail.com

OBJECTIVE

Computer Engineering graduate (July 2026) with demonstrated experience in systems development, network administration, and IoT integration. Has working knowledge of Python, Java, and C++, with practical exposure to AI-based solutions, hardware configuration, and software deployment. Seeking to apply technical knowledge and analytical skills in a professional IT environment.

EDUCATION

STI COLLEGE GLOBAL CITY *Taguig, Metro Manila*

Bachelor of Science in Computer Engineering — Graduated July 2026

- Relevant Coursework: IoT Systems, Networking, AI & Machine Learning, Circuit Design, Web Development

ARMY'S ANGEL INTEGRATED SCHOOL *2020 – 2022*

Senior High School – ICT Track, With Honors

WORK EXPERIENCE

EVEREST INTERNATIONAL ACADEMY *Taguig, Metro Manila*

IT Intern – Systems Development | February 2026 – April 2026

Designed, developed, and deployed multiple internal systems currently in active institutional use.

- **IT Asset Issuance & Management System:** Built a Google Apps Script solution for institutional asset tracking with QR code generation, issuance workflow automation, warranty alerts, and digital agreement processing. Currently in active use by the IT department.
- **HR Pre-Employment & Document Management Portal:** Developed a centralized portal automating collection, monitoring, and validation of pre-employment requirements and employee undertakings. Currently deployed and in active use by HR.
- **Automated Reporting & Executive Summaries:** Implemented script-based tools generating weekly IT asset summaries and operational status updates distributed to management.
- **Cross-Department System Integration:** Developed inter-sheet synchronization logic to enable real-time data consistency across multiple departmental records; conducted UAT for all deployed portals.
- **Digital Workflow Automation:** Produced automated document templates with embedded digital signature functionality to standardize agreement processing across departments.

EVEREST INTERNATIONAL ACADEMY *Taguig, Metro Manila*

IT Intern – Project-Based Extension | April 2026 – May 2026

- **Supplier Portal & RFQ Management System:** Developed an end-to-end procurement system — from PRF intake and RFQ generation to automated supplier email distribution with assigned deadlines, real-time dashboard tracking, deadline-breach notifications, award selection workflow, and supplier invoice upload upon award confirmation.

SIDE PROJECTS

ERP Application — Independent Side Project *April 2026 – Present*

ASP.NET Core 8 MVC, SQL Server (SSMS)

- Developing a full-stack Enterprise Resource Planning system independently, using ASP.NET Core 8 MVC with a SQL Server (SSMS) database.
- Building out modules for HR, Procurement (Purchase Orders), Transportation Management (TMS), and Enterprise Asset Management (EAMS), including a professional intranet portal dashboard.
- Refactoring toward Clean Architecture (Service Layer, Repository Pattern, EF Core) to evolve the project from a UI prototype toward a production-ready backend.

ACADEMIC PROJECTS & CONTRIBUTIONS

Smart Traffic Flow Optimization System (Capstone Project)

- Contributed to the design and implementation of AI logic for real-time vehicle and ambulance detection using object detection techniques; assisted in integrating adaptive traffic light control based on detected vehicle data.
- Presented at the College Fair & Symposium as a competing candidate in the Best in Thesis category.

Telegram Group Chat Analytics & Moderation Bot

- Developed a Telegram bot that performs automated data scraping and NLP-based word frequency analysis across group chats, identifying commonly used and flagged terms using AI classification with per-user attribution for group moderation insights.

Network Infrastructure Simulation (Cisco Packet Tracer & Virtual Machine)

- Designed a multi-floor network topology; configured inter-floor PC communication, set up Microsoft Server on a VM, and verified client–server connectivity.

YGG Game Jam — 1st Place (2023 & 2024)

- Developed core game mechanics including player movement and skill systems; contributed to game concept, gameplay flow, and environment design under hackathon constraints.

AWARDS & ACTIVITIES

- Best in Web Programming — Nov 2021
- 1st Place – YGG Game Hackathon (consecutive wins) — Nov 2023 & Nov 2024
- Participant – College Fair & Symposium, Best in Thesis Competition — Nov 2025
- Highest Social Media Engagement Award – College Fair & Symposium — Nov 2025
- Participant – IT Olympics, Cyber Security Track — Nov 2025

CERTIFICATIONS

- Packetworx – Internet of Things — Mar 2023
- Java Fundamentals — Oct 2023
- DICT – Introduction to Arduino, Pampanga Province — Aug 2024
- Introduction to Cloud Computing — Nov 2025
- DICT – IoT & Smart Solutions for PH Communities — Nov 2025
- Introduction to Cyber Security — Nov 2025

ADDITIONAL

Technical Skills: Python · Java · C++ · Machine Learning · Web Development · Arduino · Cisco Packet Tracer · Virtual Machine · AutoCAD · Google Apps Script · ASP.NET Core MVC · SQL Server

Soft Skills: Problem Solving · Critical Thinking · Communication · Logical Thinking · Systems Thinking
